**FORM 2**  
**MCH BUDGET DETAILS FOR FY 2011**

[Secs. 504 (d) and 505(a)(3)(4)]

**STATE: AK**

**1. FEDERAL ALLOCATION**

(Item 15a of the Application Face Sheet [SF 424])  
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 1,111,425

A.Preventive and primary care for children:

\$ 366,770 ( 33%)

B.Children with special health care needs:

\$ 366,770 ( 33%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 111,142 ( 10%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

**2. UNOBLIGATED BALANCE** (Item 15b of SF 424)

\$ 0

**3. STATE MCH FUNDS** (Item 15c of the SF 424)

\$ 13,657,150

**4. LOCAL MCH FUNDS** (Item 15d of SF 424)

\$ 0

**5. OTHER FUNDS** (Item 15e of SF 424)

\$ 0

**6. PROGRAM INCOME** (Item 15f of SF 424)

\$ 50,000

**7. TOTAL STATE MATCH** (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 4,471,700

\$ 13,707,150

**8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)**

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 14,818,575

**9. OTHER FEDERAL FUNDS**

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 93,713

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 0

h. AIDS: \$ 0

i. CDC: \$ 3,169,602

j. Education: \$ 0

k. Other: \$ 0

HRSA-other funds \$ 830,136

Title X-Family Plann \$ 621,108

**10. OTHER FEDERAL FUNDS** (SUBTOTAL of all Funds under item 9)

\$ 4,714,559

**11. STATE MCH BUDGET TOTAL**

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 19,533,134

### FIELD LEVEL NOTES

1. **Section Number:** Form2\_Main

**Field Name:** CDC

**Row Name:** Other Federal Funds - CDC

**Column Name:**

**Year:** 2011

**Field Note:**

CDC funding allotments include:

PRAMS: 174,868

EHDl: 194,911

BCHC (Breast and Cervical Health Check); 2,386,679

Oral Health: 413,144

2. **Section Number:** Form2\_Main

**Field Name:** OtherFedFundsOtherFund

**Row Name:** Other Federal Funds - Other Funds

**Column Name:**

**Year:** 2011

**Field Note:**

Other HRSA grants include:

Oral Health: 220,136

Universal Newborn Hearing: 300,000

Combating Autism: 300,000

Western States Genetics Collaborative : 10,000

Not counted in the grant funds as not yet awarded as of today's date:

Maternal, Infant and Early Childhood Home Visiting: 584,256

Teen Pregnancy Pre-vention Tier II funding: 600,000

### FIELD LEVEL NOTES

1. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** PregWomenExpended  
**Row Name:** Pregnant Women  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
The number of pregnant women requiring the WIC nutrition program increased and thus more dollars were appropriated to assure adequate food packages were available.
2. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** PregWomenExpended  
**Row Name:** Pregnant Women  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional fund from WIC rebates were received and applied to the program
3. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_0\_1Expended  
**Row Name:** Infants <1 year old  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
WIC rebates were received and applied to this population. In addition, additional fees were collected for metabolic screening which were used to expand consultation and education for families with identified disorders
4. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_0\_1Expended  
**Row Name:** Infants <1 year old  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional funds from WIC rebates were received and applied to funding services for infants less than one year in the areas of breastfeeding support and formula distribution as appropriate for non breastfeeding moms
5. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_1\_22Expended  
**Row Name:** Children 1 to 22 years old  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
Additional general fund dollars were received in the program to use towards EPSDT education and outreach
6. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_1\_22Expended  
**Row Name:** Children 1 to 22 years old  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
WIC rebates were received and applied to the population of 1-3 year olds.
7. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** CSHCNExpended  
**Row Name:** CSHCN  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
Additional dollars from the mental health trust authority were awarded to agencies with program for children and youth with special health care needs, the amount of dollars was greater than expected
8. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** CSHCNExpended  
**Row Name:** CSHCN  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
additional federal funds were received through federal grants for children with hearing loss
9. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** AllOthersExpended  
**Row Name:** All Others  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
Additional general fund dollars were received to support the infrastructure and rebuilding of the maternal-child health program from its demise in state fiscal year 2003-2006
10. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** AllOthersExpended

- 1. Section Number:** Form5\_Main  
**Field Name:** DirectHCExpended  
**Row Name:** Direct Health Care Services  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
An increase in planned expenditures include an increase in metabolic clinic expenses associated with additional testing in order to provide confirmation of CPT 1-disease. In additionl there were additional expenses associated with the Genetics and Birth Defects clinic as a result in a reorganization of clinic coordination and service delivery. Finally, additional diagnostic days were added for neurodevelopmental/autism screening.
- 2. Section Number:** Form5\_Main  
**Field Name:** DirectHCExpended  
**Row Name:** Direct Health Care Services  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
increase in planned expenditures includes an increase in metabolic clinic expenses associated with additional testing costs for DNA in order to provide confirmation of CPT 1-disease. In additionl there were additional expenses associated with the Genetics and Birth Defects clinic as a result in a reorganization of clinic coordination and service delivery. In addition, additional diagnostic days were added for neurodevelopmental/autism screening.
- 3. Section Number:** Form5\_Main  
**Field Name:** EnablingExpended  
**Row Name:** Enabling Services  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
Additional parent navigation services were added to the specialty clinics allowing a parent navigator to travel to the clinics and see families, however there was a decrease in dollars available for breastfeeding support and postpartum depression screening
- 4. Section Number:** Form5\_Main  
**Field Name:** EnablingExpended  
**Row Name:** Enabling Services  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional parent navigation services were added to the specialty clinics allowing a parent navigator to travel to the clinics and see families. Additional services in WIC for breast feeding support and expendtiures to support screening for postpartum depression were added.
- 5. Section Number:** Form5\_Main  
**Field Name:** PopBasedExpended  
**Row Name:** Population-Based Services  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
Additional dollars were added to metabolic screening in support of tandem mass spec, testing and the addition of CF testing.  
Additional dollars were received for newborn hearing screening care coordination and linkage with treatment. Finally expansion dollars for oral health were received.
- 6. Section Number:** Form5\_Main  
**Field Name:** PopBasedExpended  
**Row Name:** Population-Based Services  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional expenses associated with confirmation of newborn metabolic condiitions markedly increased this fiscal year. Additional funding was recieved and applied to autism expansion and public education on this topic. In additional funds for teen pregnancy media production were recieved and expensed.
- 7. Section Number:** Form5\_Main  
**Field Name:** InfrastrBuildExpended  
**Row Name:** Infrastructure Building Services  
**Column Name:** Expended  
**Year:** 2009  
**Field Note:**  
Additional general fund dollars were awarded to support the Alaska Birth Defects and FASD registry which is mandated by the state, but to date has not been supported with any general fund dollars.
- 8. Section Number:** Form5\_Main  
**Field Name:** InfrastrBuildExpended  
**Row Name:** Infrastructure Building Services  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional resources were added in the areas of staff for the MCH epidemiology unit, information technology updates and training of epidemiology staff.

**TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT**  
**STATE PROFILE FOR FY 2011**  
*[SEC. 506(A)(1)]*  
**STATE: AK**

**1. State MCH Administration:**  
*(max 2500 characters)*

The Section of Women's, Children's and Family Health within the Division of Public Health, Alaska Department of Health and Social Services, administers the MCH Title V program. Services included within Title V administrative control include: 1. CSHCN related programs cover Specialty Clinics (Cleft Lip and Palate Clinic and Neurodevelopmental/Autism Clinics, Birth Defects, Genetics and Metabolic Clinics, Newborn Metabolic Screening, and Early Hearing Detection and Intervention (EHDI) Program/Universal Newborn Hearing screening 2. Direct and Enabling services for women and children and teens through grants or contracts include Breast and Cervical Cancer Screening Outreach, parent navigation services for CYSHCN, and Family Planning and Reproductive Health Services offered through Public Health nursing centers, community health centers and federally qualified health centers and partnerships serving adolescent populations 3. Data collection and surveillance activities include the Alaska Birth Defects/ FAS Registry, the Alaska Maternal and Infant Mortality Review/Child Death Review, PRAMS, Toddler Survey (CuBS), Alaska Surveillance of Child Abuse and Neglect, and special research and data analysis projects. Infrastructure building occurs in the school nursing and school health programs, adolescent health and many of the programs for children with special health care needs and chronic conditions. Other programs that are not administered by Title V, but collaborate closely with Title V include programs influencing the health and safety of young children and adolescents including Early Intervention/Infant Learning program, EPSDT, Alaska Immunization Program, Women, Infants and Children (WIC) Nutrition program, Family Violence Prevention, Childhood and Adolescent Injury Prevention, Family Nutrition, and the Early Comprehensive Care Systems (ECCS), Strengthening Families Initiative, Assuring Better Child Development Screening Academy, Early Childhood Mental Health, School Health and programs focused on chronic disease such as diabetes, asthma, and heart disease. Several of these aforementioned programs receive Title V funding in support of their outcome objectives.

a. Pregnant Women	11,056
b. Infants < 1 year old	11,139
c. Children 1 to 22 years old	234,498
d. CSHCN	2,239
e. Others	0

**11. Statewide Initiatives and Partnerships:**

**a. Direct Medical Care and Enabling Services:**  
*(max 2500 characters)*

Direct Medical Care and Enabling Services: i. Family Planning and Reproductive Health Services - Family planning and related preventive health services were provided to teens of all ages at State Public Health Centers, Community Health Centers and private health care clinics in Alaska. The State of Alaska's Family Planning Program continues to support efforts reduce the incidence of Statutory Rape in Alaska (the statutes refer to this as Sexual Abuse of a Minor 1-4. Staff continue to refine their training model to increase awareness and understanding by clinical health care providers of the inherent risks associated with Statutory Rape, their role as mandatory reporters, and ways to approach teens and educate them on issues associated with unhealthy relationships. WCFH completed its first two years of an interdepartmental agreement with the Division of Public Assistance on the Out of Wedlock and Teen Pregnancy Prevention initiative utilizing TANF funding. Funding is currently directed to interested community-based youth programs in pilot communities where there is documented high out-of-wedlock/teen pregnancies and lack of family planning services. Coordination of these services is occurring with federally qualified health centers and community health centers. ii. Specialty Clinics - Since there are no pediatric geneticists in Alaska, Seattle Children's Hospital and Regional Medical Center (CHRM) is contracted to conduct statewide outreach clinics. The contract includes services of clinical geneticists who offer diagnostic clinics for children/adults with genetic diseases, birth defects, or persons at risk for genetic conditions because of ethnicity, family history or age. Oregon Health Sciences University is contracted with to provide in state Metabolic clinics for children diagnosed with metabolic disorders. Efforts are made to involve local health practitioners in these clinics to insure coordination of care. No one was refused services due to inability to pay. Clinics are coordinated with public health nursing centers in smaller communities outside of Anchorage. Outreach for referrals and education has been focused on federally qualified health centers and community health centers across the state. Other clinics offered include Neurodevelopmental and Autism, Neurology and Cleft Lip and Palate Team clinics.

**b. Population-Based Services:**  
*(max 2500 characters)*

Population-based Services: i. Newborn Metabolic Screening Program -100% of infants in the state were screened. Education of hospital staff is so successful that screening refusals are zero in most communities. All infants identified with CAH and carnitine disorders are referred to the Genetics and/or Metabolic Clinics conducted by the State of Alaska. Infants identified with hypothyroidism are put on treatment and linked with the local pediatric endocrinologist. Those infants identified with hemoglobinopathies are referred to the local pediatric hematologist/oncologist. Also, infants identified with reportable conditions are entered into the Alaska Birth Defects/FAS Registry. ii. Newborn Hearing Screening-over 90% of all infants born in Alaska were screened for hearing prior to their discharge from the hospital or birthing center. Title V staff assist to coordinate the program in hospitals, birthing centers and with nursing public health centers in communities where there are fewer than 35 births per year. Staff are also responsible for

establishing linkages with private audiologists, early intervention programs and speech language therapists. iii. Alaska Immunization Program: This program consists of education, public awareness and compliance activities in partnership with schools and private organizations. Statewide broadcasts of public service announcements and public relations campaigns with the Iditarod Trail Committee are designed to raise public awareness. A statewide conference and presentations to professional public health staff provide training opportunities, and assessments at public health centers and private practices ensure compliance and availability of vaccines. iv. Perinatal program-this program is in the midst of assessing where the greatest needs are in communities and focused on outreach education around such issues as postpartum depression, preterm delivery and low birth weight prevention, smoking cessation, appropriate maternal weight, and SIDS/roll over death prevention information and education. v. Child Passenger Safety Program - All major and most hub communities now have had CPS trainings and many have some type of CPS inspection and/or education service available for families. The program continues to support, retain and increase the number of CPS technicians state wide with CPS updates and technician courses offered in Seward, Juneau, Anchorage, Kenai and Kodiak.

c. Infrastructure Building Services:

(max 2500 characters)

The MCH-Epidemiology Unit publishes numerous reports, bulletins and peer-reviewed journal articles. One Alaska Maternal and Child Health Data Book will be published in SFY11. The Toddler Survey using the model of PRAMS was initiated this year. Other special analysis and burden documents produced include an analysis of MIMR data and the health disparities of perinatal deaths in Alaska, a study on Attention Deficit Disorder and other analyses as requested. In addition, Alaska SCAN (Alaska Surveillance of Child Abuse and Neglect) was established and has quickly developed agreements across the gather data on child maltreatment from a variety of sources to offer a more complete picture of child maltreatment. Improved linkages between the use of data and programs have been initiated to assist programs in the use of better outcome evaluation methodology. Other infrastructure based activities include ongoing work and development of advisory committees made up of parents, consumers, health care provider and agency stake holders for adolescents, newborn metabolic screening, early hearing detection and intervention and children and youth with special health care needs. Ongoing assessment of the needs of communities is inherent in the work done by programs. Administrative staff are also intimately involved in policy making in many areas as well as conducting quality assurance and helping to community and adhere to established standards of practice.

1. **Section Number:** Form11\_Performance Measure #12

**Field Name:** PM12**Row Name:****Column Name:****Year:** 2009**Field Note:**

/2011/ There is a data discrepancy for Elmendorf Air Force Base hospital. Without Elmendorf, the hospital screening rate is 98%. Total screening rate for all births is 94%, not including Elmendorf.

2. **Section Number:** Form11\_Performance Measure #12

**Field Name:** PM12**Row Name:****Column Name:****Year:** 2008**Field Note:**

62 infants were not available for screening for one of the following reasons: parental refusal, parental non-response, moved out of state, infant deceased. They were not included in the denominator.

Steady increases are occurring thanks to the active support by the direct entry midwife community in referring families for screening. Hearing screening equipment is available in the communities where the majority of home births or birthing center births occur. Intensive follow up of these families through registered mail and follow up phone calls has also resulted in some families seeking hearing screening for their newborns.

3. **Section Number:** Form11\_Performance Measure #12

**Field Name:** PM12**Row Name:****Column Name:****Year:** 2007**Field Note:**

Data Source: AK Bureau of Vital Statistics, AK Newborn Hearing Screening Program

**PERFORMANCE MEASURE # 13**

Percent of children without health insurance.

**Field Level Notes****1. Section Number:** Form11\_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2009**Field Note:**

FY2011 Data Source: ABVS for the number of live births.

This is for reporting year 2010. Data on the number of children born with Fetal Alcohol Spectrum Disorders (FASD) are based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry. Data is presented as 3-year averages - for example, data presented for reporting year 2009 is for children born in 2000-2002. Since more children will be diagnosed as they get older, the prevalence for any specific cohort will change year to year. For the reporting year 2010, the prevalence of FASD for children born 2001-2003 is 13.8 (n=413, d=30,037), as of May 2010. The average age of diagnosis for FAS is 5-6 years. Due to the small number of annual events that occur in Alaska, rates are presented for three-year birth cohorts.

**2. Section Number:** Form11\_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2008**Field Note:**

Numerator: Number of reported cases of Fetal Alcohol Spectrum Disorders (FASD) during a consecutive three-year time period.

Denominator: Total number of Alaska-resident live births during a consecutive three-year time period.

Data on the number of children born with Fetal Alcohol Spectrum Disorders (FASD) are based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry. Data is presented as 3-year averages - for example, data presented for reporting year 2008 is for children born in 1999-2001.

Since more children will be diagnosed as they get older, the prevalence for any specific cohort will change year to year. For the reporting year 2009, the prevalence of FASD for children born 2000-2002 is 16.9 (n=505, d=29,930), as of April 2009. The average age of diagnosis for FAS is 5-6 years. Due to the small number of annual events that occur in Alaska, rates are presented for three-year birth cohorts.

**3. Section Number:** Form11\_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2007**Field Note:**

Data Source: Alaska Bureau of Vital Statistics for the number of live births.

Data on the number of children born with Fetal Alcohol Spectrum Disorders (FASD) are based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry.

For each reporting year, prevalence is calculated for several birth cohorts, but only one cohort is shown in the table. For example, data presented for reporting year 2007 is for children born 1998-2000, as of May 2008.

Since more children will be diagnosed as they get older, the prevalence for any specific cohort will change year to year.

For the reporting year 2008, the prevalence of FASD for children born 1999 - 2001 is 15.4 (n=462, d=29948), as of May 2008.

The average age of diagnosis for FAS is age 5-6 years. Due to the small number of annual events that occur in Alaska, rates are presented for three-year birth cohorts.

**STATE PERFORMANCE MEASURE # 9 - REPORTING YEAR**

Percentage of infants who are reported to have a Cleft Lip/Palate defect who access the Title V sponsored Cleft Lip and Palate Specialty Clinic within the first year of life.

**Field Level Notes****1. Section Number:** Form11\_State Performance Measure #9**Field Name:** SM9**Row Name:****Column Name:****Year:** 2009**Field Note:**

Data wasnot evaluated for this state performance measure for this year's submission. We are re-evaluating the usefulness of this indicator as a measure effectiveness of our CLP referral process.

Some families do not participate in state-sponsored Cleft Lip and Palate Specialty Clinics even though they have been referred to the clinics. Instead they choose to seek medical care out of state for a variety of reasons (to be near extended family, to access a Craniofacial center closer to their homes than the nearest state-sponsored clinic, to remain within the military healthcare system, or to address other major health problems that cannot be treated at facilities within the state). In addition some children who have cleft palates in conjunction with other life-threatening conditions do not survive long enough to participate in state-sponsored clinics.

**2. Section Number:** Form11\_State Performance Measure #9**Field Name:** SM9**Row Name:****Column Name:****Year:** 2008**Field Note:**

None

### FIELD LEVEL NOTES

- 1. Section Number:** Form13\_Main  
**Field Name:** Question1  
**Row Name:** #1. Family members participate on advisory committee or task forces...  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Family members and consumers are included as active members in all of the advisory councils sponsored by the MCH Title V/CSHCN program. These include, EHDl, NBMS, Adolescent health, Perinatal, Oral Health, Breast and Cervical Health Check, Autism/Neurodevelopmental, ECCS, and many other ad hoc groups. New committees in formation include School Health, school nursing and a teen advisory committee which will include teens with special health care needs. A Family Advisory committee consisting of parents of children with chronic health conditions as well as developmental disabilities has been created in collaboration with the Stone Soup Group and the Family Voices representative. In addition, Title V staff participate in committees that include parents including the Governor's Council for Disabilities and Special Education. During SFY2011, a workshop on cultural competency and family involvement will be sponsored by SOA/WCFH to enhance skills in cultural competency.
- 2. Section Number:** Form13\_Main  
**Field Name:** Question2  
**Row Name:** #2. Financial support (...) is offered for parent activities or parent groups.  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Whenever parents or families participate, efforts to include those from outside of Anchorage or hub communities are made. Travel is by air much of the time, so travel expenses include hotel, ground and meal per diem as well. Upon occasion, assistance can be provided for child care, but this not always possible due to state procurement restrictions. Our programs attempt to be creative in this area, however. With the recent hire of a staff position for Parent Support Services, this member now attends many of the planning committees regarding the ECCS plan, Strengthening Families (child abuse prevention effort) early childhood mental health and other community agency meetings to assure that the voices of parents are considered in the planning. Parents are also supported in their attendance at national meetings to support their education and provide training.
- 3. Section Number:** Form13\_Main  
**Field Name:** Question3  
**Row Name:** #3. Family members are involved in the Children with Special Health Care Needs...  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Family members participate in providing feedback all year long in meeting our performance measures and assuring that programs are meeting the needs of children and families. This year the new state Parent Support Services manager, Kris Green along with Family Voices Co-Chair, Travis Hedwig, provided leadership in representing the MCH Title V/CSHCN program as a parent representative for the AMCHP state team and participated in meetings associated with the MCH Block grant review. MCH funds are also utilized to pay for a family member or staff member of CSHCN to attend the MCH Block grant review in Seattle at the Region X office. Kris and Barb actively participate in planning and educational activities with other state family representatives including Becky Adelman from Oregon and Cassie Johnson, and Susan Rey from Washington. This year parents representatives from the Family Advisory committee were included in planning and prioritization during our stakeholder meetings for the 5 year needs assessment. A rich discussion ensued with excellent ideas proposed to change systems statewide in support of improving the experience for families. These ideas are outlined in the Needs assessment and are reflected in our priorities.
- 4. Section Number:** Form13\_Main  
**Field Name:** Question4  
**Row Name:** #4. Family members are involved in service training of CSHCN staff and providers.  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Kris Green, the new Parent Support Services Manager has begun to develop curriculum for training all new staff on parent involvement and inclusion. A technical assistance request from HRSA was granted for the FY2010 year for cultural competency assessment and training scheduled during the statewide MCH-Immunization conference scheduled for September 2010. Further T.A. in developing curriculum and infusing family centeredness into the public health workforce may be sought from HRSA
- 5. Section Number:** Form13\_Main  
**Field Name:** Question5  
**Row Name:** #5. Family members hired as paid staff or consultants to the State CSHCN program...  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
The MCH Title V program has a contract with the Stone Soup Group for parent navigation services. Parent navigation is provided for all specialty clinics (genetics, metabolic, neurodevelopmental, autism, and cleft lip and palate). They are also actively involved in the ECCS grant, Autism infrastructure and training and any planning. In November of 2008, a Kris Green a parent of premature twin boys was hired in the role of Parent Support Services and Autism Development. Along with many other responsibilities, she is tasked to assure that the voice of parents is well represented in all of the programs and that programs and systems are designed with parents involvement and input. She recently formed a Family Advisory committee in partnership with the Stone Soup Group and the Family Voice Coordinator as well.
- 6. Section Number:** Form13\_Main  
**Field Name:** Question6  
**Row Name:** #6. Family members of diverse cultures are involved in all of the above activities  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Latino/Hispanic and Alaska Native cultures are the predominant ethnic cultures in Alaska. Thus we seek to make sure they are always well represented on the advisory groups. Assuring that men are involved has also been very important. African American and Asian populations are well represented on the staff in programmatic and support functions and they are frequently involved in planning. Better recruitment of other ethnic populations remains at the top of our list.

**FORM 14**  
**LIST OF MCH PRIORITY NEEDS**

*[Sec. 505(a)(5)]*

**STATE: AK FY: 2011**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce substance abuse among families, including alcohol, tobacco and drugs.
2. Reduce child maltreatment and bullying.
3. Collaborate with families to work toward a system of integrated services for families with infants, children, and teens, and especially those with special health care needs.
4. the risks associated with unintended pregnancy and teen pregnancy.
5. Reduce dental caries in children 0 - 21 years of age.
6. Reduce intimate partner violence (IPV) including teen dating violence.
7. Reduce risk factors associated with preventable post-neonatal mortality due to SIDS/asphyxia.
8. Support communities to increase family and youth resiliency.
9. Reduce the prevalence of obesity and overweight throughout the lifespan.
10. Increase universal screening for post partum depression in women.

**TECHNICAL ASSISTANCE(TA) REQUEST**

STATE: AK

APPLICATION YEAR: 2011

No.	Category of Technical Assistance Requested	Description of Technical Assistance Requested (max 250 characters)	Reason(s) Why Assistance Is Needed (max 250 characters)	What State, Organization or Individual Would You suggest Provide the TA (if known) (max 250 characters)
1.	<b>General Systems Capacity Issues</b> If you selected State or National Performance Measure Issue categories above, identify the performance measure to which this issue pertains by entering the measure number here: <u>      N/A      </u>	Assistance in social marketing around safe sleep initiatives and reduction of perinatal mortality	Unique ethnic population and traditional care of infants.	unknown at this time
2.	<b>General Systems Capacity Issues</b> If you selected State or National Performance Measure Issue categories above, identify the performance measure to which this issue pertains by entering the measure number here: <u>      N/A      </u>	Develop guidance to state entities regarding the appropriate application of HIPAA and FERPA privacy rules with respect to data sharing agreements between state agencies, for the purposes of public health research and program evaluation.	Several MCH programs rely on linking datasets from different agencies to conduct surveillance activities or program outcomes. For example, the Early Hearing and Detection Intervention (EHDI) program needs to link to the Early Intervention/Infant Learning Program (EI/ILP) to know whether or not infants who require follow-up received the appropriate services. These two programs reside in different divisions within Department of Health. We have been unable to link data because of concerns about FERPA confidentiality rules. Another example is the Alaska Surveillance of Child Abuse and Neglect (SCAN) program. We have developed a unique and comprehensive system of surveillance that requires linking datasets of multiple agencies with overlapping jurisdictions and authorities. To understand the epidemiology of maltreatment, we need to examine records at the household level by using the unique household identifier from the Office of Children's Services' dataset. Currently we are unable to, due to concerns with HIPAA confidentiality rules. The barriers to data sharing may be real or perceived.	Unknown at this time.
3.	<b>Data-related Issues - Data Systems Development</b> If you selected State or National Performance Measure Issue categories above, identify the performance measure to which this issue pertains by entering the measure number here: <u>      N/A      </u>	Autism surveillance technical assistance	Alaska is in need of developing a surveillance system for autism spectrum disorder that will be sustainable and not require active case verification	possibly Florida

12.	If you selected State or National Performance Measure Issue categories above, identify the performance measure to which this issue pertains by entering the measure number here: _____			

**FORM NOTES FOR FORM 15**

None

**FIELD LEVEL NOTES**

None

**FORM 16**  
**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: AK**

SP(Reporting Year) # 1

**PERFORMANCE MEASURE:**

Percentage of mothers of newborns who say their physician or health plan would not start prenatal care as early as they wanted or they could not get an appointment as early as they wanted.

**STATUS:**

Active

**GOAL**

To ensure early entrance into prenatal care to enhance pregnancy outcomes.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who wanted prenatal care and reported that their doctor or health plan would not start prenatal care as early as they wanted or they could not get an appointment as early as they wanted.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who wanted prenatal care.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-16a

Increase the proportion of pregnant women who receive early and adequate prenatal care beginning in the first trimester of pregnancy to 90%.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Early identification of maternal disease and risks for complications of pregnancy or birth are the primary reason for first trimester entry into prenatal care. Alaska PRAMS data has shown that 1 in 5 women did not get prenatal care as early as they wanted. Reported barriers to receiving prenatal care as early as they wanted included, 'couldn't get an appointment earlier' (28.6%) and 'doctor or health plan would not start earlier' (13.8%).

PERFORMANCE MEASURE:	Percent of women who smoked during the last 3 months of pregnancy among women who smoked 3 months prior to pregnancy and were talked to about the effects of smoking by a prenatal health care provider.
STATUS:	Active
GOAL	To reduce the number of women who smoke prenatally.
DEFINITION	<p><b>Numerator:</b> Number of women delivering a live-born infant who reported that they smoked 3 months prior to pregnancy and had been talked to about the effects of prenatal smoking by a prenatal health care provider and reported that they also smoked during the last 3 months of pregnancy.</p> <p><b>Denominator:</b> Total number of Alaska-resident women delivering a live-born infant who reported that they smoked 3 months prior to pregnancy and had been talked to about the effects of prenatal smoking by a prenatal health care provider.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
HEALTHY PEOPLE 2010 OBJECTIVE	<p>Objective 16-17c Increase the proportion of women who abstain from cigarette smoking during pregnancy to at least 99%.</p> <p>Related to Objective 1-3b Increase counseling about smoking cessation (among population, not just pregnant women).</p>
DATA SOURCES AND DATA ISSUES	Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.
SIGNIFICANCE	Maternal smoking during pregnancy is associated with increased infant morbidity and mortality especially as it relates to preterm and low birth weight infants. Maternal smoking during pregnancy may result in a lower birth weight, spontaneous abortion, or other serious complications of pregnancy. Mothers who smoke throughout pregnancy usually have infants that weigh between 150 to 300 grams less than non-smoking mothers. Based on Alaska smoking rates, research reported by the U.S. Surgeon General indicates that 5% of perinatal deaths, 20% of low birth-weight babies, and 8% of pre-term deliveries could be avoided annually in Alaska if maternal smoking were eliminated.

SP(Reporting Year) # 3

**PERFORMANCE MEASURE:**

Percentage of children ages 10-11 who are at-risk for being overweight.

**STATUS:**

Active

**GOAL**

To reduce the percentage of children who are overweight and at-risk for being overweight.

**DEFINITION**

Number of children who are at-risk for being overweight as defined by NCHS BMI classification.

**Numerator:**

Number of children who are at-risk for being overweight as defined by NCHS BMI classification.

**Denominator:**

Total number of children ages 10-11 in Alaska.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 19-3a-c

Reduce the proportion of children who are obese or overweight to 5% or less.

**DATA SOURCES AND DATA ISSUES**

Centers for Disease Control and Prevention. National Survey of Child Health. This survey is not conducted on a yearly basis.

**SIGNIFICANCE**

A recent report from the Institute of Medicine estimates that approximately nine million children over six years of age are currently obese. In Alaska, over the last two decades, the prevalence of overweight among children ages 6-11 years has more than doubled, increasing from 7% in 1980 to 15% in 2000. Overweight among adolescents ages 12-19 years has tripled during the same time period – from 5% to 15%. In addition, recent analysis of Anchorage School District data showed that more than one-third of the students assessed were overweight or at-risk of overweight.

**PERFORMANCE MEASURE:**

Rate (per 1,000) of substantiated reports of harm children ages 0 through 18.

**STATUS:**

Active

**GOAL**

To reduce the number of children and teenagers who experience child abuse and neglect

**DEFINITION**

x

**Numerator:**

The number of children who have a substantiated report of abuse and neglect.

**Denominator:**

The number of all children between birth and 18 years living in Alaska.

**Units:** 1000    **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska Division of Family and Youth Services

**SIGNIFICANCE**

The 1995 Edition of "Child Abuse and Neglect: A Look at the States," reported in 1993, Alaska led the nation in substantiated/indicated child maltreatment in physical abuse, neglect and sexual abuse. Child abuse and neglect have short and long term consequences lasting a lifetime. Efforts must be directed toward preventing child abuse and neglect and when it does occur, assuring early intervention and support services for the child.

SP(Reporting Year) # 5

**PERFORMANCE MEASURE:**

Percentage of women who recently had a live-born infant who reported their prenatal health care provider advised them not to drink alcohol during their pregnancy.

**STATUS:**

Active

**GOAL**

To reduce the number of women who drink prenatally.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they had received prenatal care and had been advised not to drink alcohol by their prenatal health care provider.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they had received prenatal care.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-17a

Increase the proportion of women who abstain from drinking alcohol during pregnancy to at least 96%.

Related to Objective 1-3c

Increase counseling about reduced alcohol consumption (entire population, not just pregnant women).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Prenatal exposure to alcohol is associated with a wide range of infant outcomes from Fetal Alcohol Syndrome (FAS) to very subtle effects. FAS is the most common preventable cause of mental retardation in the U.S. In a recent advisory on alcohol use during pregnancy, the Surgeon General recommended that health professionals regularly ask women of childbearing age about alcohol use and to inform them of the risks of drinking alcohol during pregnancy. It is further recommended that they advise them not to drink alcohol during pregnancy. In Alaska during 2002, a survey of FAS Knowledge, Attitudes, Beliefs and Behaviors (KABB) found that 36% of obstetrician/gynecologists responded that it was OK for a pregnant woman to drink alcohol occasionally, more than double the percent of either Pediatricians or Family Physicians. However, over 90% of physicians strongly agreed that FAS is preventable.

SP(Reporting Year) # 6

**PERFORMANCE MEASURE:**

Prevalence (per 100) of unintended pregnancies that resulted in a live birth among women who reported having a controlling partner during the 12 months prior to getting pregnant.

**STATUS:**

Active

**GOAL**

To reduce the number of unintended pregnancies.

**DEFINITION**

x

**Numerator:**

Number of women delivering a live-born infant who reported that their pregnancy was unintended (either mistimed or unwanted) and that they had a controlling partner (i.e. husband or partner threatened her, limited her activities against her will, or made her feel unsafe in any other way) during the 12 months prior to getting pregnant.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they had a controlling partner during the 12 months prior to getting pregnant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objective 9-1

Increase the percentage of women who have an intended pregnancy to at least 70% (all pregnancies, not just those resulting in a live-birth).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

In Alaska, PRAMS 2002 data showed that 45.3% of births were unintended resulting in a personal and financial burden for Alaskan families as well as the welfare system. 58.4% of births to women receiving prenatal care paid by Medicaid were unintended. Each unintended birth costs the welfare system approximately \$31,185 for the prenatal care and infant care during the first year of life. Increasing access to family planning services is a critical component in reducing unintended births.

SP(Reporting Year) # 7

**PERFORMANCE MEASURE:**

Percentage of women who recently had a live-born infant who reported that they always or often felt down, depressed, or hopeless since their new baby was born.

**STATUS:**

Active

**GOAL**

To reduce the number of women experiencing post-partum depression (need to look up HP2010, see note below) .

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they always or often felt down, depressed, or hopeless since their new baby was born.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objective 16-5c

Reduce the number of hospitalizations for post-partum complications, including depression. This is a developmental objective.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Alaska PRAMS 2002 data showed that 4.7% of Alaskan women delivering a live-birth reported they were very depressed and 14.5% reported they were moderately depressed. More than half (51.9%) reported they experienced low to moderate depression. Among women who self-reported postpartum depression (56.6%), more than 1 in 5 indicated they wanted to see a mental health professional and 1 in 8 had not seen one.

SP(Reporting Year) # 8

**PERFORMANCE MEASURE:**

Prevalence at birth (per 1,000) of Fetal Alcohol Spectrum Disorders (FASD).

**STATUS:**

Active

**GOAL**

To reduce the prevalence of Fetal Alcohol Spectrum Disorders (FASD).

**DEFINITION**

The prevalence at birth of fetal alcohol spectrum disorders (FASD)

**Numerator:**

Number of reported cases of Fetal Alcohol Spectrum Disorders (FASD) during a consecutive three-year time period.

**Denominator:**

Total number of Alaska-resident live births during a consecutive three-year time period.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

Relates to Objective 16-18

Reduce Fetal Alcohol Syndrome (FAS). This is a developmental objective.

**DATA SOURCES AND DATA ISSUES**

Alaska Bureau of Vital Statistics is the reporting source for the number of live births. Data on the number of children born with Fetal Alcohol Spectrum Disorders will be provided based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry. Due to the small number of annual events that occur in Alaska, rates are presented in three-year moving averages.

**SIGNIFICANCE**

Fetal Alcohol Spectrum Disorders are 100% preventable if a woman does not consume alcoholic beverages during pregnancy. Many children with FASDs do not catch up with their peers or outgrow their disabilities and many of these problems may not be identified at birth or become obvious until the child reaches school age or later. The 1996-1998 Alaska prevalence for FAS was 1.6 per 1,000 live births. The Alaska Fetal Alcohol Syndrome Surveillance Project estimates that 163 children are born each year with effects of maternal drinking during pregnancy that may fall across the FASD continuum.

**PERFORMANCE MEASURE:**

Percentage of infants who are reported to have a Cleft Lip/Palate defect who access the Title V sponsored Cleft Lip and Palate Specialty Clinic within the first year of life.

**STATUS:**

Active

**GOAL**

Increase access to health care services to CSHCN.

**DEFINITION****Numerator:**

Number of Alaskan children from birth to age 1 that were reported to have a Cleft Lip/Palate defect and accessed the Cleft Lip and Palate Specialty Clinic.

**Denominator:**

Number of Alaskan children from birth to age 1 that were reported to have a Cleft Lip/Palate defect.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objectives 16-23 and 21-15

These Objectives are related to increasing service systems to CSHCN and increasing recording and referral of children and youth with cleft lip/palate.

**DATA SOURCES AND DATA ISSUES**

Alaska Birth Defects Registry and the Alaska Cleft Lip and Palate Specialty Clinic Program. Not all diagnoses occur between the ages of birth and one year. Submucous cleft palates (those covered by the mucous membrane over the roof of the mouth) may be identified when children are older and develop abnormally nasal speech. Some families do not participate in state-sponsored Cleft Lip and Palate Specialty Clinics even though they have been referred to the clinics. Instead they choose to seek medical care out of state for a variety of reasons (to be near extended family, to access a Craniofacial center closer to their homes than the nearest state-sponsored clinic, to remain within the military healthcare system, or to address other major health problems that cannot be treated at facilities within the state). In addition some children who have cleft palates in conjunction with other life-threatening conditions do not survive long enough to participate in state-sponsored clinics.

**SIGNIFICANCE**

For the 5-year period 1998-2002, the rate of oral cleft among Alaskan children was 3.1 per 1,000 population – nearly 3 times higher than the national rate of 1.2 per 1,000 population. During this same period the rate of oral cleft was nearly 2 times as high among Alaska Native children as white children – 5.0 and 2.7 per 1,000 population, respectively. Early specialty care is necessary in order for these infants to thrive and remain healthy, and it provides an opportunity to educate parents about a condition that often is unfamiliar to them. Because children with clefts require many types of services over a period of years, their care must be coordinated. Specialty clinics offer a multidisciplinary approach and include providers such as plastic surgeons, speech therapists, audiologists, ear-nose-throat specialists, pediatric dentists, orthodontists, oral surgeons, pediatricians, and dietitians. This team of providers assures quality and continuity of care along with long-term follow-up that results in optimal outcomes for patients. Without treatment, these children are subject to poor weight gain due to difficulty sucking and eating, hearing loss due to untreated ear infections, unintelligible speech due to incompetent lip and palate, extensive oral disease and dental disease due to unerupted and malposed teeth, and psychological damage due to teasing.

SO(Reporting Year) # 2

**OUTCOME MEASURE:**

Death rate per 100,000 due to unintentional injuries among children 15 through 19 years.

**STATUS:**

Active

**GOAL**

To reduce the number of children and teenagers who die in Alaska from injuries from unintentional causes such as motor vehicle crashes, playground injuries, gunshots, dog maulings, falls, choking, poisoning, etc.

**DEFINITION**

Numerator: The number of children ages 15 through 19 years who die of unintentional injuries in Alaska. Denominator: The number of all children ages 15 through 19 years. All data reported as three year moving averages.

**Numerator:**

The number of children ages 15 through 19 years who die of unintentional injuries in Alaska.

**Denominator:**

The number of children ages 15 through 19 years in Alaska.

**Units:** 100000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Bureau of Vital Statistics; the Maternal and Infant Morbidity and Mortality Committee; and the Child Fatality Review Committee.

**SIGNIFICANCE**

Alaska is the most dangerous state in the country for children and teenagers. This is according to the latest report from the Johns Hopkins Center for Injury Research and Policy. From 1986-1992, the injury death rate for Alaskans from birth through age 19 was 45.7 per 100,000. Although improved over the previous six year rate of 55.6 deaths per 100,000, Alaska's injury death rate among children and youth still ranked first in the nation and was 50% greater than the national rate of 30.2 per 100,000 (Injury to Children and Teenagers, State-by-State Mortality Facts, S.P. Baker, et al).

**FORM 17**

**Field Name:** HSC02

**Row Name:**

**Column Name:**

**Year:** 2007

**Field Note:**

Data source: Division of Health Care Services

**HEALTH SYSTEMS CAPACITY MEASURE # 03**

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

	<b>Annual Indicator Data</b>				
	<b>2005</b>	<b>2006</b>	<b>2007</b>	<b>2008</b>	<b>2009</b>
<b>Annual Indicator</b>	<u>76.8</u>	<u>86.5</u>	<u>68.5</u>	<u>68.4</u>	<u>83.5</u>
<b>Numerator</b>	<u>63</u>	<u>64</u>	<u>61</u>	<u>52</u>	<u>76</u>
<b>Denominator</b>	<u>82</u>	<u>74</u>	<u>89</u>	<u>76</u>	<u>91</u>

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

**Field Name:** Med\_Women  
**Row Name:** Pregnant Women  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Pregnant women are not funded under Title XXI, CHIP.
2. **Section Number:** Form18\_Indicator 06 - SCHIP  
**Field Name:** SCHIP\_Infant  
**Row Name:** Infants  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
There are few children in the SCHIP 0 - 1 age range. Only babies who were not born to mothers on Title XIX Medicaid. Babies born to mothers on Medicaid are funded under Title XIX Medicaid for the first year and are reflected in the Medicaid eligibility level table.
3. **Section Number:** Form18\_Indicator 06 - SCHIP  
**Field Name:** SCHIP\_Women  
**Row Name:** Pregnant Women  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Pregnant women are not funded under Title XXI, CHIP.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: AK**

**HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)**  
*(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)*

<b>DATABASES OR SURVEYS</b>	<b>Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *</b>	<b>Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)</b>
<b>ANNUAL DATA LINKAGES</b>		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	Yes
Annual linkage of birth certificates and WIC eligibility files	2	No
Annual linkage of birth certificates and newborn screening files	3	Yes
<b>REGISTRIES AND SURVEYS</b>		
Hospital discharge survey for at least 90% of in-State discharges	3	No
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

\*Where:  
1 = No, the MCH agency does not have this ability.  
2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.  
3 = Yes, the MCH agency always has this ability.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: AK**

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other:		

\*Where:  
1 = No  
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.  
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

<b>Notes:</b>
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.

**FORM NOTES FOR FORM 19**

None

**FIELD LEVEL NOTES**

None

**FORM 20**  
**HEALTH STATUS INDICATORS #01-#05**  
**MULTI-YEAR DATA**  
**STATE: AK**

**Form Level Notes for Form 20**

None

**HEALTH STATUS INDICATOR MEASURE # 01A**

The percent of live births weighing less than 2,500 grams.

	<u>Annual Indicator Data</u>				
	2005	2006	2007	2008	2009
Annual Indicator	6.0	5.9	5.7	6.0	
Numerator	630	652	623	682	
Denominator	10,415	10,958	11,007	11,416	

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer  
 than 5 and therefore a 3-year moving average cannot be  
 applied.

2. **Section Number:** Form20\_Health Status Indicator #03B

**Field Name:** HSI03B

**Row Name:**

**Column Name:**

**Year:** 2008

**Field Note:**

Source: AK Bureau of Vital Statistics. This indicator is reported as a 3-year moving average, 2008 covers 2006 - 2008. The latest available data is 2006-2008.

3. **Section Number:** Form20\_Health Status Indicator #03B

**Field Name:** HSI03B

**Row Name:**

**Column Name:**

**Year:** 2007

**Field Note:**

Source: AK Bureau of Vital Statistics. This indicator is reported as a 3-year moving average, 2007 covers 2005 - 2007. The latest available data is 2005-2007.

**HEALTH STATUS INDICATOR MEASURE # 03C**

The death rate per 100,000 from unintentional injuries due to motor vehicle crashes among youth aged 15 through 24 years.

	<b>Annual Indicator Data</b>				
	<b>2005</b>	<b>2006</b>	<b>2007</b>	<b>2008</b>	<b>2009</b>
<b>Annual Indicator</b>	<u>26.9</u>	<u>21.6</u>	<u>24.9</u>	<u>25.1</u>	<u>          </u>
<b>Numerator</b>	<u>78</u>	<u>64</u>	<u>75</u>	<u>76</u>	<u>          </u>
<b>Denominator</b>	<u>290,239</u>	<u>296,409</u>	<u>301,774</u>	<u>302,886</u>	<u>          </u>

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

Is the Data Provisional or Final?

Children 0 through 19 years old	<u>176,986.0</u>
Percent Below: 50% of poverty	<u>0.0</u>
100% of poverty	<u>8.4</u>
200% of poverty	<u>0.0</u>

## FORM NOTES FOR FORM 21

Source: American Community Survey, Table S1701. Covers children under 18 years. Total number of children is the population for whom poverty status is determined. The %age is the ACS percent. Latest data is for 2008.

### FIELD LEVEL NOTES

1. **Section Number:** Form21\_Indicator 09A  
**Field Name:** HSIRace\_Children  
**Row Name:** All children 0 through 19  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Data source: AK Dept. of Labor. Estimates by race are for race alone, not in combination.
2. **Section Number:** Form21\_Indicator 09A  
**Field Name:** HSIRace\_SingleParentPercent  
**Row Name:** Percent in household headed by single parent  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Source: KidsCount, Population and Family Characteristics. Data covers 2008 and is not available by race due to small numbers.
3. **Section Number:** Form21\_Indicator 09A  
**Field Name:** HSIRace\_JuvenileCrimeRate  
**Row Name:** Rate (per 100,000) of juvenile crime arrests  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Note: We report "Referrals" rather than "Arrests". A referral is a request by a law enforcement agency for a DJJ response following the arrest of a juvenile or as a result of the submission of a police investigation report alleging the commission of a crime or violation of a court order. A referral is counted as a single episode or event and may relate to multiple charges. Referrals by race is for ages 0 - 18+. The denominator is a count of children 0 - 19. The latest available data for the denominator (children by race category) is for the previous year.
4. **Section Number:** Form21\_Indicator 09A  
**Field Name:** HSIRace\_DropOutPercent  
**Row Name:** Percentage of high school drop-outs (grade 9 through 12)  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Source: Department of Education and Early Development. Asian and Pacific Islander categories are combined, not counted separately.
5. **Section Number:** Form21\_Indicator 09B  
**Field Name:** HSIEthnicity\_SingleParentPercent  
**Row Name:** Percent in household headed by single parent  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
There is no data available by Hispanic or Latino ethnicity, due to small numbers.
6. **Section Number:** Form21\_Indicator 09B  
**Field Name:** HSIEthnicity\_DropOutPercent  
**Row Name:** Percentage of high school drop-outs (grade 9 through 12)  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Source: Department of Education and Early Development. Asian and Pacific Islander categories are not counted separately. Hispanic ethnicity not included in White race category.
7. **Section Number:** Form21\_Indicator 10  
**Field Name:** Frontier  
**Row Name:** Living in frontier areas  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Population counts in rural/urban areas by age group are not available. Estimates of the urban/rural allocation from the 2000 census were applied to current population estimate of children 0-19 years. Metropolitan areas in AK are the Municipality of Anchorage and Fairbanks North Star Borough. Population estimates for Frontier areas are included in the population estimate for rural areas.
8. **Section Number:** Form21\_Indicator 11  
**Field Name:** S11\_total  
**Row Name:** Total Population  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Population for whom poverty status is determined.
9. **Section Number:** Form21\_Indicator 12  
**Field Name:** S12\_50percent  
**Row Name:** Percent Below: 50% of poverty  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Data not available.
10. **Section Number:** Form21\_Indicator 12  
**Field Name:** S12\_200percent  
**Row Name:** 200% of poverty  
**Column Name:**  
**Year:** 2011  
**Field Note:**  
Data not available.
11. **Section Number:** Form21\_Indicator 09A  
**Field Name:** HSIRace\_FosterCare  
**Row Name:** Number living in foster home care

SP(New for Needs Assessment cycle 2011-2015) # 1

**PERFORMANCE MEASURE:**

Percent of women who recently delivered a live-born infant and reported having one or more alcoholic drinks in an average week during the last 3 months of pregnancy.

**STATUS:**

Active

**GOAL**

To reduce substance abuse, including alcohol, tobacco and drugs, among families.

**DEFINITION**

Numerator: Number of women delivering a live-born infant who had 1 or more drinks a week during the last 3 months of pregnancy. Denominator: Number of Alaska-resident women delivering a live-born infant.

**Numerator:**

Number of women delivering a live-born infant who had 1 or more drinks a week during the last 3 months of pregnancy.

**Denominator:**

Number of Alaska-resident women delivering a live-born infant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related Objective 16-17a. Increase abstinence from alcohol among pregnant women to 94%.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System, Phase VI, Q. 36a. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Heavy alcohol use is associated with fetal alcohol syndrome disorders and moderate alcohol use has demonstrated effects on preterm delivery. During 2000-2008, this measure ranged from 3.5% (2006) to 5.3% (2005) and there was no significant change in trend. Most women who consumed any amount of alcohol were in the < 1 drink per week category. Older mothers (35+ years) reported a higher proportion of consuming alcohol than younger mothers (20-24 years).

<b>PERFORMANCE MEASURE:</b>	Percent of high school students who smoked cigarettes on 20 or more days during the previous 30 days.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce substance abuse, including alcohol, tobacco and drugs, among families.
<b>DEFINITION</b>	<p>Numerator: Number of high school students who smoked cigarettes on 20 or more days during the 30 days before the survey. Denominator: Number of Alaska-resident high school students who smoked cigarettes on one or more of the 30 days before the survey.</p> <p><b>Numerator:</b> Number of high school students who smoked cigarettes on 20 or more days during the 30 days before the survey.</p> <p><b>Denominator:</b> Number of Alaska-resident high school students who smoked cigarettes on one or more of the 30 days before the survey.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	Related Objective 27-2b: Reduce tobacco use in the past month by adolescents to 16% .
<b>DATA SOURCES AND DATA ISSUES</b>	Youth Risk Behavior Surveillance System. YRBSS is a weighted state based survey that can be generalized to Alaska-resident students in grades 9-12. Parental consent issues may limit ability to collect representative sample data. The survey is conducted every two years.
<b>SIGNIFICANCE</b>	This is a measure of frequent tobacco use. Tobacco use and addiction usually begin in adolescence. Furthermore, tobacco use may increase the probability that an adolescent will use other drugs. Preventing tobacco use among youth has emerged as a major focus of tobacco control efforts. In Alaska, frequent tobacco use among adolescents declined from 21% in 1995 to 7.4% in 2007.

<b>PERFORMANCE MEASURE:</b>	Rate of reports of maltreatment per thousand children age 14 years or younger.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce child maltreatment and bullying.
<b>DEFINITION</b>	<p>Numerator: Number of children under age 18 years who have a report of maltreatment in the Alaska Surveillance of Child Abuse and Neglect system. Denominator: Number of Alaska-resident children under age 18 years.</p> <p><b>Numerator:</b> Number of children age 0-14 years who have a report of maltreatment in the Alaska Surveillance of Child Abuse and Neglect system.</p> <p><b>Denominator:</b> Number of Alaska-resident children age 0-14 years.</p> <p><b>Units:</b> 1000    <b>Text:</b> Rate</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	Related Objective 15-33: Reduce maltreatment of children under age 18 years to 10.3 per 1,000.
<b>DATA SOURCES AND DATA ISSUES</b>	Alaska Surveillance of Child Abuse and Neglect (SCAN). SCAN utilizes linked data from a variety of sources to track reports of maltreatment. SCAN's definition of maltreatment includes situations where maltreatment may not have been the proximate cause of morbidity or fatality, but was a contributing factor or underlying cause. It is a wider, more encompassing definition and a more accurate reflection of family disruption. It includes, but is not limited to, "substantiated reports of harm" that is typically reported by the Office of Children's Services. The nature of maltreatment of young children is different than that of older children. In young children maltreatment is primarily neglect whereas in older children it is primarily abuse.
<b>SIGNIFICANCE</b>	Consequences of child maltreatment during infancy or early childhood include damage to cognitive, language and socioemotional development; and mental health. Children experiencing maltreatment are at increased risk for adverse health effects and behaviors as adults.

<b>PERFORMANCE MEASURE:</b>	Percent of women who recently delivered a live-born infant and are not doing anything now to keep from getting pregnant.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce the risks associated with unplanned pregnancy, short pregnancy spacing, and teen pregnancy.
<b>DEFINITION</b>	<p>Numerator: The number of women who recently delivered a live-born infant who are not doing anything to keep from getting pregnant. Denominator: Number of Alaska-resident women delivering a live-born infant.</p> <p><b>Numerator:</b> The number of women who recently delivered a live-born infant who are not doing anything to keep from getting pregnant.</p> <p><b>Denominator:</b> Number of Alaska-resident women delivering a live-born infant.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>

#### HEALTHY PEOPLE 2010 OBJECTIVE

#### DATA SOURCES AND DATA ISSUES

Alaska Pregnancy Risk Assessment Monitoring System, Phase VI, Q. 61. PRAMS is a weighted state based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

#### SIGNIFICANCE

In adopting the life course perspective, we extend our view of the individual by considering the health of the fetus. Unplanned pregnancy is associated with health behaviors during pregnancy, such as smoking and drinking, that can impose adverse effects. Unplanned pregnancy is also associated with increased risk of morbidity for women. Teen pregnancy is associated with adverse outcomes to both infant and mother. Pregnancy spacing is also an important health issue, and mothers who are not using a method to keep from getting pregnant after recently delivering a baby are at risk of having another pregnancy at less than the recommended spacing.

<b>PERFORMANCE MEASURE:</b>	Percent of mothers who report tooth decay in their 3-year old child.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce dental caries in children 0 - 21 years of age.
<b>DEFINITION</b>	<p>Numerator: Number of mothers of 3-year-olds born in Alaska who report a health care provider said her child had tooth decay or cavities. Denominator: Number of Alaska-resident women who have an Alaska-born 3-year old child.</p> <p><b>Numerator:</b> Number of mothers of 3-year-olds born in Alaska who report a health care provider said her child had tooth decay or cavities.</p> <p><b>Denominator:</b> Number of Alaska-resident women who have an Alaska-born 3-year old child.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	Related Objective 21-1a: Reduce the proportion of young children aged 2 to 4 years with dental caries experience in their primary teeth to 11%.
<b>DATA SOURCES AND DATA ISSUES</b>	Childhood Understanding Behaviors Survey (CUBS), Phase II, Q. 18. CUBS is a weighted, state-based survey that can be generalized to Alaska-resident mothers of 3-year-old children born in Alaska. It is a three-year follow-up to PRAMS. In 2008 there was a 49% response rate.
<b>SIGNIFICANCE</b>	Dental caries, or tooth decay, is the most prevalent chronic disease of childhood. Among children, oral disease and oral pain have been associated with speech problems, difficulty eating, sleep problems, poor school performance and reduced self esteem. The current recommendation for the first dental visit is at eruption of the first tooth or no later than age 1. However, there is a severe shortage of pediatric dentists in the state. Denali KidCare/Medicaid enrolled children have serious difficulties accessing dental services.

<b>PERFORMANCE MEASURE:</b>	Percent of high school students who were hit, slapped, or physically hurt on purpose by their boyfriend or girlfriend during the previous 12 months.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce intimate partner violence (IPV) including teen dating violence.
<b>DEFINITION</b>	<p>Numerator: Number of high school students who were ever hit, slapped, or physically hurt on purpose by their boyfriend or girlfriend during the 12 months before the survey Denominator: Number of Alaska-resident high school students.</p> <p><b>Numerator:</b> Number of high school students who were ever hit, slapped, or physically hurt on purpose by their boyfriend or girlfriend during the 12 months before the survey</p> <p><b>Denominator:</b> Number of Alaska-resident high school students.</p> <p><b>Units:</b> 100 <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	
<b>DATA SOURCES AND DATA ISSUES</b>	Youth Risk Behavior Surveillance System (YRBSS). YRBSS is a weighted state based survey that can be generalized to Alaska-resident students in grades 9-12. Parental consent issues may limit ability to collect representative sample data. The survey is conducted every two years.
<b>SIGNIFICANCE</b>	Violence and unhealthy relationships can begin in adolescence. Teen dating violence is becoming an issue. There are significant gaps in knowledge and data about intimate partner violence. According to a national survey conducted in 1995 by the National Institute of Justice and the Centers for Disease Control and Prevention, 52% of surveyed women said they were physically assaulted as a child or as an adult. Eighteen percent of the women surveyed said they had been the victim of a completed or attempted rape at some time in their life. Of those, more than half were younger than 18 years at the time of the attempted or completed rape. Violence against women is predominantly intimate partner violence. National studies indicate that Native American and Alaska Native women are more than 2.5 times more likely to be raped or sexually assaulted than women in other women in the U.S. Adverse childhood events, such as experiencing violence in the family, affects the health of the individual throughout their life.

**PERFORMANCE MEASURE:**

Percent of women who recently delivered a live-born infant and experienced intimate partner violence 12 months before pregnancy.

**STATUS:**

Active

**GOAL**

To reduce intimate partner violence (IPV) including teen dating violence.

**DEFINITION**

Numerator: Number of women delivering a live-born infant who: a) were physically hurt by their husband or partner during the 12 months before getting pregnant (Q. 38); OR b) called the police during the 12 months before getting pregnant because she felt threatened by their husband or partner (Q. 66); OR d) was threatened or limited in activity by their husband or partner during the 12 months before getting pregnant (Q. 71a). Denominator: Number of Alaska-resident women delivering a live-born infant.

**Numerator:**

Number of women delivering a live-born infant who: a) were physically hurt by their husband or partner during the 12 months before getting pregnant (Q. 38); OR b) called the police during the 12 months before getting pregnant because she felt threatened by their husband or partner (Q. 66); OR d) was threatened or limited in activity by their husband or partner during the 12 months before getting pregnant (Q. 71a).

**Denominator:**

Number of Alaska-resident women delivering a live-born infant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related Objective 15-34: Reduce the rate of physical assault by current or former intimate partners to 3.3 physical assaults per 1,000 persons aged 12 years and older.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System, Phase VI, Q. 38, 66, & 71a . PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

There are significant gaps in knowledge and data about intimate partner violence. According to a national survey conducted in 1995 by the National Institute of Justice and the Centers for Disease Control and Prevention, 52% of surveyed women said they were physically assaulted as a child or as an adult. Eighteen percent of the women surveyed said they had been the victim of a completed or attempted rape at some time in their life. Violence against women is predominantly intimate partner violence. National studies indicate that Native American and Alaska Native women are more than 2.5 times more likely to be raped or sexually assaulted than women in other women in the U.S.

<b>PERFORMANCE MEASURE:</b>	Percent of women who recently delivered a live-born infant and reported having one or more environmental factors in the home that are associated with SIDS/unexplained asphyxia.
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce risk factors associated with preventable post-neonatal mortality due to SIDS/asphyxia.
<b>DEFINITION</b>	<p>Numerator: Number of women delivering a live-born infant who reported: a) putting their baby down to sleep most often on the side or stomach (Q. 58); OR b) the baby usually sleeps with pillows, bumper pads, plush blankets, or stuffed toys (Q. 59). Denominator: Number of Alaska-resident women delivering a live-born infant whose infant is alive and living with the mom.</p> <p><b>Numerator:</b> Number of women delivering a live-born infant who reported: a) putting their baby down to sleep most often on the side or stomach (Q. 58); OR b) the baby usually sleeps with pillows, bumper pads, plush blankets, or stuffed toys (Q. 59).</p> <p><b>Denominator:</b> Number of Alaska-resident women delivering a live-born infant whose infant is alive and living with the mom.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	Related Objective 16-1h: Reduce deaths from sudden infant death syndrome to 0.25 deaths per 1,000 live births. Related Objective 16-1c: Reduce postneonatal deaths to 1.2 per 1,000 live births.
<b>DATA SOURCES AND DATA ISSUES</b>	Alaska Pregnancy Risk Assessment Monitoring System, Phase VI, Q. 58 & 59. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.
<b>SIGNIFICANCE</b>	SIDS/unexplained asphyxia is the top preventable cause of postneonatal mortality in Alaska. The Alaska Division of Public Health has embarked on a Safe Sleep Initiative to educate parents and caregivers on safe sleep environments.

<b>PERFORMANCE MEASURE:</b>	Percent of high school students who reported a parent talks to them about school once or twice a month or more.
<b>STATUS:</b>	Active
<b>GOAL</b>	Support communities to increase family and youth resiliency
<b>DEFINITION</b>	<p>Numerator: Number of Alaskan high school students who reported a parent talks to them about school about once or twice a month or more. Denominator: Number of Alaska-resident high school students .</p> <p><b>Numerator:</b> Number of Alaskan high school students who reported a parent talks to them about school about once or twice a month or more.</p> <p><b>Denominator:</b> Number of Alaska-resident high school</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	
<b>DATA SOURCES AND DATA ISSUES</b>	Youth Risk Behavior Surveillance System (YRBSS). YRBSS is a weighted state based survey that can be generalized to Alaska-resident students in grades 9-12. Parental consent issues may limit ability to collect representative sample data. The survey is conducted every two years.
<b>SIGNIFICANCE</b>	The youth development approach focuses on young people's capacities, strengths and developmental needs and not solely on their problems, risks or risky behaviors. Supports, services and opportunities are offered across multiple domains including: cognitive, physical, vocational, and social/emotional development; personal resilience; environmental and personal risk factors; and civic engagement. Since youth development occurs in a family and community context, collaboration between diverse sectors (for example, school and business partnerships) is needed.

<b>PERFORMANCE MEASURE:</b>	Percent of mothers who report their 3-year-old child had a BMI greater than the 85th percentile (overweight and obese).
<b>STATUS:</b>	Active
<b>GOAL</b>	To reduce the prevalence of obesity and overweight throughout the lifespan.
<b>DEFINITION</b>	<p>Numerator: Number of mothers of 3-year olds born in Alaska who report their child's BMI is greater than 85th percentile.</p> <p>Denominator: Number of Alaska-resident women who have an Alaska-born 3-year old child.</p> <p><b>Numerator:</b> Number of mothers of 3-year olds born in Alaska who report their child's BMI is greater than 85th percentile.</p> <p><b>Denominator:</b> Number of Alaska-resident women who have an Alaska-born 3-year old child.</p> <p><b>Units:</b> 100    <b>Text:</b> Percent</p>
<b>HEALTHY PEOPLE 2010 OBJECTIVE</b>	Related Objective 19-3a: Reduce the proportion of children aged 6 to 11 years who are overweight or obese (at or above 95th percentile of BMI) to 5%.
<b>DATA SOURCES AND DATA ISSUES</b>	Childhood Understanding Behaviors Survey (CUBS), Phase III, Q. 3 & 4. The BMI measurement is derived from the mother's measurement of the child's height and weight. CUBS is a weighted, state-based survey that can be generalized to Alaska-resident mothers of 3-year-old children born in Alaska. It is a three-year follow-up to PRAMS. In 2008 there was a 49% response rate.
<b>SIGNIFICANCE</b>	Similar to the rest of the nation, Alaska is experiencing an obesity epidemic that will have serious health, social and economic impacts for decades to come. Today, with the high rates of overweight and obesity among children and adolescents, world health experts are predicting that this generation of children will be the first to live shorter lives than their parents. In Alaska, 27% of high school students are overweight or obese and one-third (33%) of children entering kindergarten in Alaska's largest school district are above a normal weight. Obese children and adolescents are more likely to become obese adults and to develop chronic diseases. <sup>8</sup> Almost 40% of obese children already have at least two cardiovascular disease risk factors, such as high blood pressure or high blood cholesterol. <sup>9</sup> In most cases, as these children age, their health risks will increase in number and severity.
